NSF Director's
Program Review

One NSF Embraces Core Values for International Engagement

- Intellectual partnerships and mutual benefit are the norm
- Students and junior researchers engaged internationally
- Global networks link expertise and resources are common

NSF Director's
Program Review

These NSF programs have incorporated an explicit international research dimension...

- Engineering Research Centers
- Research Coordination Networks
- Catalyzing New International Collaborations

NSF Director's
Program Review

These NSF programs encourage international workforce development...

- (International) Research Experiences for Undergraduates*
- Graduate Research Fellowship Program
- Integrative Graduate Education and Research Traineeship Program
- East Asia Pacific Summer Institutes
- Pan-American Advanced Studies Institutes
- (International) Postdoctoral Research Fellowship Program *

*Alignment of OISE programs with NSF-wide programs

NSF Director's
Program Review

These new programs require leveraged resources and an international context...

- Global Venture Fund
- Partnerships for Enhanced Engagement in Research (PEER-Science)
- Science Across Virtual Institutes
