Dear colleagues,

I am delighted to announce that the following edited book was published during the summer:

The book analyses a number of EU internal policies and external relations from the perspective of achieving decarbonization by 2050. Taking such a focus highlights the continued short-termism of much internal policy development, and even more so in external relations. It provides an analysis of how the EU is faring on the pathway towards decarbonization, and what is left to be done. We do hope the book will provide some useful insights for you all, especially in preparation for the climate negotiations in Paris!

Here is the table of contents:

1. Decarbonization in the EU: Setting the Scene - Claire Dupont and Sebastian Oberthür
2. The EU Internal Energy Market and Decarbonization - Radostina Primova
3. The Power Sector: Pioneer and Workhorse of Decarbonization - Stefan Lechtenböhmer and Sascha Samadi
4. Electricity Grids: No Decarbonization Without Infrastructure - Thomas Sattich
6. Transport: Addicted to Oil - Tom van Lier and Cathy Macharis
7. Buildings: Good Intentions Unfulfilled - Elin Lerum Boasson and Claire Dupont
8. The Geopolitics of the EU’s Decarbonization Strategy: a Bird’s Eye Perspective - Tom Casier
9. Decarbonization and EU Relations with the Caspian Sea Region - Claire Dupont
10. Evolutions and Revolutions in EU-Russia Energy Relations - Olga Khrushcheva and Tomas Maltby
11. EU-Norway Energy Relations Towards 2050: From Fossil Fuels to Low-Carbon Opportunities - Torbjorg Jevnaker, Leiv Lunde and Jon Birger Skjaerseth
12. Conclusions: Lessons Learned - Claire Dupont and Sebastian Oberthür

Happy reading!

Best,

Claire Dupont
